Town and Country Choose EPOS Solution for Roll-Out of New Après Bar Concept

Town and Country choose the Cratos EPOS Solution for the roll out of their new Après Bar concept. Town and Country use the Cratos EPOS Solution at their existing Après, Mechu and Mix Bars / Restaurants in Birmingham.

The reliability and stability of the Cratos Solution is key to a high volume, high turnover business. The system will be provided with the new Javelin 2.5 Viper Touch Screens which Cratos have the exclusive rights in the UK and Europe.

"I need to know that the system is totally foolproof and don't want to have to worry about the system going down on a busy night." said Les Cowell of Town and Country.

"We will provide to Town and Country a Mirror Server Solution. This will mirror all Open Tabs and Payment Information from the Main Server to a Secondary Server. In the unlikely event of the Main Server failing, the EPOS terminals will switch over to the secondary backup server with no loss of transactions and open tabs" said Alan Stuart, UK Sales Director.

About Town and Country

Town and Country decided on the Cratos EPOS solution when they opened 3 years ago. They have 19 EPOS points between their Mechu, Après and Mix brands. Their stylish Bar designs have won them the coveted "National Interior Design Bar UK theme awards". For more information on Town and Country visit www.summerrow.com.
