The Astor Hotel Choose Cratos PMS and EPOS Solutions

The Astor Hotel have chosen the Cratos PMS (Property Management System) and EPOS solutions for their Reception, Bars and Restaurant.

The system will operate in a recently restored 62 room hotel which also has conference and function facilities. With the implementation of the EPOS system, guests buying from the Bar/Restaurant can have their bill charged automatically to their room.

The database will be stored on an off-site central server, which will be accessed via a 2MB DSL Virtual Private Network.

As part of the solution, Cratos will provide the Astor Hotel with their Internet Interface module. This will provide real-time internet bookings via their web site.

Cratos will provide a Data Conversion service to import their current Guestmaster data to the Cratos PMS Solution.
