Jenkins Bakery to Trial the Cratos EPOS Solution

Cratos will supply Touch-screen order terminals to record sales of Jenkins products at their Bakery shops.

Along with Sales, the system will also capture deliveries, shop waste and bakery waste which will send back to head office automatically on a daily basis.

At Head Office, reports will show Opening Balances, Sales, Wastage, Deliveries, and Closing Balances for each product line for each and all their shops.

Initially the system will be installed at one of their shops and then after a successful trial period, Jenkins will then roll-out the solution to the rest of their shops.

The system will be installed with the new Javelin Viper 2.5 which Cratos has the exclusive distributions rights within the UK and Europe.

"We have provided our solution to a number of Bakery Chains in the Past. We have worked closely with Birds Bakery of Derby to produce tailored Management reporting necessary for the Bakery Industry" said Alan Stuart, UK Sales Director of Cratos. "We are extremely pleased that Jenkins have chosen Cratos to provide a trial of our solution and look forward to working closely with them to develop additional bespoke features to the software." he added.

About Cratos

Cratos Hospitality Services Ltd is an EPOS Solutions provider to the Hospitality and Retail industries. Their in-house software, exclusive open architecture hardware products and 24 Hour Hardware and Software support provide a complete and comprehensive computerised solution.
