Kitchen Video Beta Version Installed at Shooters Bar and Grill Restaurant in Germany

Cratos Hospitality Services Ltd trial their New Kitchen Video solution at Shooters Bar And Grill Restaurant in Germany. The Kitchen Video System links to the Cratos EPOS solution and displays kitchen orders on video screens. The Kitchen Video System replaces prep printers and kitchen staff are able to bump orders from the screen when their preparation is complete. Each preparation station only see what items they are to prepare on the screen. When all items of an order are bumped from the preparation screen, the expeditor screen shows the order complete and ready to be served.

The Kitchen Management System (KMS) is being trialed in a busy restaurant and bar in Germany on a U.S Military Base. The product has been developed over the last 12 months and Cratos have worked closely with Chili's Restaurants with the design. Chili's will install the system into their U.K restaurants as the 2nd part of the beta trial later this year.

"The Kitchen Management System installed at our Restaurant will provide quicker service and better quality of food to our customers" said Michael Gallagher, Restaurant Manager of Shooters Bar and Grill.

"The development of Kitchen Video is the natural evolution path of the Cratos EPOS solution and our continuing commitment to the development and enhancements of the product" said Sue A'court, Senior Software Analyst.
