

Westcliff Casino Installs Cratos EPOS Solution

One of the largest provisional casinos in Great Britain has installed the Cratos EPOS solution into their Restaurants and Bars.

The Main Restaurant is a 100 cover A La Carte Restaurant and is one of the most popular dining venues in Essex. The Main Bar is one of the most fashionable destinations in Southend to socialize and entertain. The Terrace Restaurant recently refurbished in an Al Fresco style and is popular with customers who enjoy the brasserie menu in 'continental' style surroundings. (source: www.westcliffcasinos.co.uk)

The Solution has also been installed into the adjoining Spielers Casino which incorporates a Bar and Restaurant.

"We installed the system into the existing network infrastructure which has a Windows 2003 server backbone." said Alan Stuart, Head of UK sales. "Because of the remote locations of 2 of the 10 EPOS units, we were able to connect the tills to an existing wireless network which runs over a 103Mbps link" he added.

Because the Westcliff Operation runs 2 happy hours during the course of each day, Cratos were able to implement the Timed Menus option of the EPOS solution, which automatically switches prices during the happy hour periods. This means that promotional drink prices cannot be sold out of there designated time slots.
