

The Brasserie at Mallory Court Opens with the Cratos EPOS Solution

Mallory Court has opened their Stylish Brasserie using the Cratos Supplied Hardware and Software Solution. The Main Bar incorporates a Javelin EPOS Touch Screen Unit with additional terminals in the Conservatory and Dispense bar located in their upstairs seating area.

The Restaurant is a 100 Cover brasserie restaurant, created in the former Groundkeeper's lodge which adjoins the recently launched Knights Suite Conference and Wedding facility. The cottage includes areas for private dining and small meetings.

The Cratos Solution is an extension to their existing system for which they have the Cratos Property Management System, Inventory Control, Timekeeping, Touch screen Tills and Handhelds.

With a shared database distributed between the 3 locations, EPOS transactions can be charged to Rooms from any location. The system is setup so as to detail sales information by each location, therefore giving detailed management information including Sales Statistics and Inventory usage for each or all areas of the business.

"We have worked closely with SCC to provide a Citrix Server and thin client solution" said Jeremy Westcott, Operations Director of Cratos.

Robert B Stuart, CEO of Cratos Hospitality Services Ltd, said "We have an excellent working relationship with Mallory Court and our Solution has been able to adapt to the growth and expanding facilities of the Hotel."

About Cratos
